SUMMARY

Technical leader with 9+ years driving cross-functional web delivery, marketing technology strategy, and GTM execution across multi-brand B2B SaaS environments. Managed the full lifecycle of 7 web properties as the connective tissue between Marketing, Sales, Product, and Engineering. Deep hands-on experience with martech stack architecture (Marketo, Salesforce, 6sense, HubSpot), CMS platforms (Contentful, WordPress), experimentation programs (Optimizely, VWO), and analytics infrastructure (GA4, GTM, server-side tagging). Combines technical fluency with stakeholder management, vendor oversight, and delivery accountability.

CORE COMPETENCIES

Marketing Tech & CRM: Marketo, HubSpot, Salesforce, 6sense, Optimizely, VWO, Lead routing, Lifecycle automation, ABM

Analytics & SEO: Google Tag Manager (multi-container), GA4, Server-side tagging, Core Web Vitals, SEMrush, Ahrefs, A/B testing

CMS & Architecture: Contentful, WordPress, HubSpot CMS, Webflow, Composable architecture, Design systems, Feature flags

Project Delivery: Agile/Scrum, Jira, Capacity planning, RACI documentation, Vendor management, Contract negotiation, Stakeholder alignment

Web Development: JavaScript/ES6+, TypeScript, Vue.js, React, Next.js, Astro, Node.js, HTML5/CSS3, Tailwind

Infrastructure: AWS (Lambda, CloudFront, S3, Route53), Netlify, Vercel, CircleCI, GitHub, CI/CD pipelines, Snyk, DataDog

Design: Figma, Adobe Creative Suite, UI/UX, Component libraries, Design systems, Brand consistency

EXPERIENCE

Senior Web Development Manager

AffiniPay (rebranded to 8am) • Austin, TX (Remote) • 2016–2025

B2B fintech/legaltech SaaS. Web properties are the primary acquisition channel across 7 brands. Owned all platforms, marketing technology integrations, and cross-functional GTM delivery.

Cross-Functional Delivery & Stakeholder Management

- Coordinated across Sales, Marketing, Product, Engineering, Legal, and InfoSec on roadmap priorities, system requirements, and campaign execution
- Managed team of 5 (developers, designers, contractors); designed org structure with capacity planning models (80/20 roadmap/requests) and sprint frameworks
- Led company-wide rebrand across 7 web properties with zero downtime, coordinating brand, legal, product, and engineering stakeholders
- Created RACI documentation for systems, integrations, and operational responsibilities; established escalation paths and incident response protocols
- Managed vendor relationships and contract negotiations (AWS, Contentful, Netlify, Marketo); reduced infrastructure costs 20%

Marketing Technology & GTM Infrastructure

- Architected Marketo integration with websites, forms, APIs, and advertising platforms for accurate lead routing, scoring, and lifecycle automation
- Built Salesforce data pipelines connecting web to CRM; designed workflows for lead attribution and conversion tracking across all properties
- Integrated 6sense for account-based personalization, connecting intent signals to sales workflows and segmented experiences
- Developed PLG routing infrastructure (AWS proxy services) routing users through self-serve or sales-assist flows based on journey signals
- Primary owner of third-party integrations across digital ecosystem: hosting, marketing platforms, CRM, analytics, and partner APIs

Analytics, Experimentation & Conversion

- Owned Google Tag Manager setup and governance across all brand properties; managed tags, triggers, variables, and event tracking
- Architected GA4 implementation with server-side tagging for improved data accuracy, privacy compliance, and performance
- Led A/B testing program (Optimizely, VWO) with testing methodology and Visual CMS integration that increased conversion rates
- Established data governance including GDPR compliance, tagging standards ensuring measurement accuracy across touchpoints

Web Platform & Architecture

- Architected migration from legacy PHP/WordPress to modern Jamstack (Astro, AWS Lambda, Contentful, Netlify CI/CD); reduced technical debt 60%
- Built component-based design system enabling rapid experimentation and consistent on-brand experiences across all properties
- Security lead for web platforms: SSL/TLS management, SOC2 compliance, monitoring, access controls, and incident response

PROJECTS

GTM Sales Dashboard — AI-powered sales operations dashboard integrating Claude AI for natural language lead analysis and pipeline insights. Connects to 6sense, Salesforce, and Slack APIs. React, TypeScript, Zustand, Netlify Functions.

AI Website Assistant — Published Chrome extension integrating Claude API for on-page website analysis and recommendations.

Fever Dream — iOS app (App Store). Real-time audio-reactive visual processor using Swift and Metal shaders.

EARLIER EXPERIENCE

Front End Developer — RankHammer (2015–2016) | Freelance Web Developer — Dallas (2015) | Web Designer & Developer — QuickSilver Interactive (2014–2015) | Web Developer — Ride For The Brand (2010–2014, 4 AAF ADDY Awards)

EDUCATION

Bachelor of Fine Arts, Visual Communications (Graphic Design) • University of Texas at Arlington • 2009
